H. R. 2564

To amend title 18, United States Code, to prohibit human cloning.

IN THE HOUSE OF REPRESENTATIVES

June 5, 2007

Mr. Weldon of Florida (for himself, Mr. Stupak, Mr. Smith of New Jersey, Mr. Pitts, Mr. Pence, Mr. Boozman, Mr. Garrett of New Jersey, Mr. Fortenberry, Mrs. Schmidt, Mr. Franks of Arizona, Mr. Chabot, Mr. King of Iowa, Mr. Akin, Mr. Renzi, Mr. Lipinski, Mr. Rahall, Mr. McIntyre, Mr. Manzullo, Mr. Sessions, Mrs. Jo Ann Davis of Virginia, Mr. Tiahrt, Mr. Gingrey, Mr. Lewis of Kentucky, Ms. Foxx, Mr. Boustany, Mr. Hensarling, Mr. Jordan of Ohio, Mr. Terry, Mr. Ferguson, and Mr. Keller of Florida) introduced the following bill; which was referred to the Committee on the Judiciary

A BILL

To amend title 18, United States Code, to prohibit human cloning.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,
- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Human Cloning Prohi-
- 5 bition Act of 2007".
- 6 SEC. 2. FINDINGS.
- 7 Congress finds that—

- (1) some individuals have announced that they will attempt to clone human beings using the technique known as somatic cell nuclear transfer already used with limited success in sheep and other animals;
 - (2) nearly all scientists agree that such attempts pose a massive risk of producing children who are stillborn, unhealthy, or severely disabled, and considered opinion is virtually unanimous that such attempts are therefore grossly irresponsible and unethical;
 - (3) efforts to create human beings by cloning mark a new and decisive step toward turning human reproduction into a manufacturing process in which children are made in laboratories to preordained specifications and, potentially, in multiple copies;
 - (4) because it is an asexual form of reproduction, cloning confounds the meaning of "father" and "mother" and confuses the identity and kinship relations of any cloned child, and thus threatens to weaken existing notions regarding who bears which parental duties and responsibilities for children;
 - (5) because cloning requires no personal involvement by the person whose genetic material is

- used, cloning could easily be used to reproduce living
 or deceased persons without their consent;
 - (6) creating cloned live-born human children (sometimes called "reproductive cloning") necessarily begins by creating cloned human embryos, a process which some also propose as a way to create embryos for research or as sources of cells and tissues for possible treatment of other humans;
 - (7) the prospect of creating new human life solely to be exploited and destroyed in this way has been condemned on moral grounds by many, including supporters of a right to abortion, as displaying a profound disrespect for life, and recent scientific advances with adult stem cells indicate that there are fruitful and morally unproblematic alternatives to this approach;
 - (8) in order to be effective, a ban on human cloning must stop the cloning process at the beginning because—
 - (A) cloning would take place within the privacy of a doctor-patient relationship;
 - (B) the transfer of embryos to begin a pregnancy is a simple procedure; and
- 24 (C) any government effort to prevent the 25 transfer of an existing embryo, or to prevent

birth once the transfer has occurred, would raise substantial moral, legal, and practical issues, so that it will be nearly impossible to prevent attempts at "reproductive cloning" once cloned human embryos are available in the laboratory;

- (9) the scientifically and medically useful practices of cloning of DNA fragments, known as molecular cloning, the duplication of somatic cells (or stem cells) in tissue culture, known as cell cloning, and whole-organism or embryo cloning of nonhuman animals are appropriate uses of medical technology;
- (10) in the preamble to the 1998 Additional Protocol on the Prohibition of Cloning Human Beings the Council of Europe agreed that "the instrumentalisation of human beings through the deliberate creation of genetically identical human beings is contrary to human dignity and thus constitutes a misuse of biology and medicine";
- (11) collaborative efforts to perform human cloning are conducted in ways that affect interstate and even international commerce, and the legal status of cloning will have a great impact on how biotechnology companies direct their resources for research and development;

1	(12) at least 23 countries have banned all
2	human cloning, including Canada, France, and Ger-
3	many;

- 4 (13) the United Nations has passed a declara-5 tion calling for all human cloning to be banned by 6 member nations; and
- 7 (14) attempts to create cloned human embryos 8 for development of embryonic stem cell lines have 9 been unsuccessful, most recently involving the exploi-10 tation of over a hundred women in South Korea to 11 provide over 2,000 human eggs without the produc-12 tion of a single stem cell line.

13 SEC. 3. PROHIBITION ON HUMAN CLONING.

14 (a) IN GENERAL.—Title 18, United States Code, is 15 amended by inserting after chapter 15, the following:

16 **"CHAPTER 16—HUMAN CLONING**

"Sec.

19

20

21

22

23

24

"301. Definitions.

"302. Prohibition on human cloning.

17 **"§ 301. Definitions**

18 "In this chapter:

"(1) Human cloning.—The term 'human cloning' means human asexual reproduction, accomplished by introducing the nuclear material of a human somatic cell into a fertilized or unfertilized oocyte whose nucleus has been removed or inactivated to produce a living organism (at any stage

of development) with a human or predominantly 1 2 human genetic constitution. "(2) Somatic cell.—The term 'somatic cell' 3 4 means a diploid cell (having a complete set of chro-5 mosomes) obtained or derived from a living or de-6 ceased human body at any stage of development. 7 "§ 302. Prohibition on human cloning "(a) IN GENERAL.—It shall be unlawful for any per-8 son or entity, public or private, in or affecting interstate 10 commerce— "(1) to perform or attempt to perform human 11 12 cloning; 13 "(2) to participate in an attempt to perform 14 human cloning; or "(3) to ship or receive the product of human 15 16 cloning for any purpose. 17 "(b) IMPORTATION.—It shall be unlawful for any per-18 son or entity, public or private, to import the product of 19 human cloning for any purpose. 20 "(c) Penalties.— "(1) IN GENERAL.—Any person or entity that 21 22 is convicted of violating any provision of this section

shall be fined under this section or imprisoned not

more than 10 years, or both.

23

1	"(2) CIVIL PENALTY.—Any person or entity
2	that is convicted of violating any provision of this
3	section shall be subject to, in the case of a violation
4	that involves the derivation of a pecuniary gain, a
5	civil penalty of not less than \$1,000,000 and not
6	more than an amount equal to the amount of the
7	gross gain multiplied by 2, if that amount is greater
8	than \$1,000,000.
9	"(d) Scientific Research.—Nothing in this sec-
10	tion shall restrict areas of scientific research not specifi-
11	cally prohibited by this section, including research in the
12	use of nuclear transfer or other cloning techniques to
13	produce molecules, DNA, cells other than human embryos,
14	tissues, organs, plants, or animals other than humans.".
15	(b) CLERICAL AMENDMENT.—The table of chapters
16	for part I of title 18, United States Code, is amended by
17	inserting after the item relating to chapter 15 the fol-
18	lowing:
	"16. Human Cloning
